Education

MCA -master's in computer application,
Kannur University,
2007.

BSc Computer Science,
Calicut University,
2004

Skills

- MongoDB
- Express
- Node
- React JS
- HTML/CSS
- Java script
- Bootstrap
- Git
- C, C++, Java
- SQL, MS-Access

Certificates

React Java script-Fundamentals to coding-Alison

FARISA JAMSHID MERN Developer

Highly motivated MERN Stack Developer. Seeking an entry-level position to apply coding skills and problem-solving abilities in developing innovative solutions within a dynamic software development environment.

Experience

Futura Labs

MERN Stack June 2022 - October 2023

Worked as an intern at Futura Labs, specializing MERN stack development.

Collaborated with a team of developers to design and implement web applications using the Mongo DB, Express, React libraries and Node. Participated in team meetings and actively contributed to discussions on project progress and improvements.

Relevant Projects

1. Online Management System for Automobile Services

Developed an online management system using React frontend for an automobile service company. Collaborated with a team of developers to design and implement the system's core functionalities. Designed and implemented a user-friendly interface for customers to book appointments, track service progress, and make payments. Integrated database functionality to store and retrieve customer information, service history, and invoices.

2. Job Board

Developed an online job board platform using React frontend for a recruitment agency.

Integrated database functionality to store and retrieve job listings, applicant profiles, and application status.

Implemented advanced search and filtering options to enhance the job search experience for users.

Incorporated a secure login and authentication system to ensure the privacy and confidentiality of user data.

3. E-Commerce App

The E-Commerce App project is a feature-rich online shopping platform built with React Frontend. It includes essential functionalities like product catalog management, shopping cart functionality, secure payment processing, and order tracking. Implemented administrative functionalities for managing product listings, inventory, and customer support. Incorporated a secure login and authentication system to ensure the privacy and confidentiality of user data.
